

Aim:-

To create a storage service using Microsoft Azure and demonstrate it by using a static web page service.

Procedure:-

- \* Create a storage Accounts in Azure
- \* Give a valid user name
- \* Select static webpage and give Index.html
- \* check the Primary URL to verify whether the static web page

Outcome:-

A static webpage has been stored as Blob in the storage Service of Azure and accessed it using the primary URL as public services

output

URL: <https://34216787.blob.com>
